

Respected Mam/Sir,

I am writing to express my interest in the Software Engineering Intern position as advertised. Currently pursuing a Bachelor of Technology in Computer Science and Engineering at Vignan University, Guntur, I have developed a solid foundation in programming and web technologies, which I am eager to apply in a real-world setting. With a GPA of 7.2/10 and practical experience in C, C++, Python, and the MERN stack, I am confident that my skills align well with the requirements of your internship program.

During my academic journey, I have successfully completed several projects that reflect my technical abilities and my passion for developing effective software solutions. For instance, I created a dynamic and responsive shopping website using HTML, CSS, and JavaScript, and developed a student file-sharing platform with authentication features. These experiences, along with my completion of the Walmart USA Advanced Software Engineering Virtual Experience Program, have equipped me with the technical and problem-solving skills essential for contributing to your team.

What excites me most about this opportunity is the chance to gain hands-on experience while collaborating with experienced professionals to solve complex problems. I am confident that my commitment to learning and my technical background will make me a valuable addition to your team.

Thank you for considering my application. I would be honoured to contribute and look forward to the opportunity to discuss how I can contribute to your team during an interview.

Sincerely,

Gnaneshwar Reddy Dontireddy
